FLOWERING BOOSTER

Organic liquid fertiliser

Bio PK 5-8 is a booster that **promotes** the **development** of fruits & flowers and **provides** plants with the correct amount of **nutrients** including trace elements.

It also **increases** the plants natural **defense** against abiotic stress and **improves** **regeneration** in case of damage.

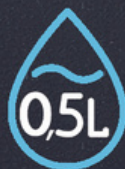

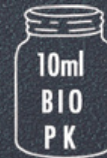

Repeated application of the product **strengthens** the **plants** and significantly **improves** their **yield** and **overall quality**.

Directions for use:

Dissolve **10 ml** of Bio PK 5-8 in **1 liter** of dechlorinated water.

Water **every plant** with **1 liter** of this solution one time per week in **weeks 2, 4 and 6** of flowering.

Available in **0.5L** & **1L** bottles and in **5L** containers.
