STARTREX
PRODUCT SHEET

Organic soil improver with a high concentration of beneficial microorganisms

Available in packages of 1.5 kg and 5 kg.

Startrex is a highly nutritious humus produced from partially decomposed grape pomace. Its main value lies in its high concentration of beneficial bacteria and fungi that immediately improve soil conditions and make it easier for plants to absorb nutrients. Unlike most sterilised substrates, Startrex is designed to revitalise the soil's microbial life, which is essential for healthy plant growth.

By mixing Startrex into your substrate, you can bring your soil back to life immediately. It stimulates the development of mycorrhizal fungi and favours the growth of beneficial soil bacteria, which in turn improves the overall health and well-being of your plants.

With Startrex, your plants will root faster, grow vigorously and thrive at an incredible speed. It is a perfect solution to give your crop an explosive start, ensuring that your plants receive all the nutrients and minerals they need to thrive.

Product benefits

· Highly nutritious, with an abundance of beneficial bacteria and fungi.

· Revitalises the soil immediately, improving the overall health and vigour of plants.
· Stimulates the development of mycorrhizal fungi, optimising nutrient absorption.
· Speeds up rooting and promotes vigorous growth from the start.
· Provides a wide range of trace elements and improves the structure and water retention of the substrate.
· Easy to mix and compatible with other BioTabs products.

Guaranteed analysis

Humified grape pomace-based organic soil improver 100%

Dry matter	75%
Organic carbon	45%
Organic nitrogen	3%
Potassium (K2O)	4%
pH	7
Electrical conductivity	1.74 mS/cm
C/N ratio	15

Directions for use

Use as an organic soil improver for vegetables, flowers, herbaceous plants, shrubs and trees.
· Indoor and outdoor (pots): mix 50 g per 10 L of substrate.
· Full soil: mix 200-250 g per m2 of soil.

Cautions and storage conditions

· Store in a cool and dry place.
· Not suitable for human consumption.
· Keep out of reach of children and animals.
· Do not mix with aggressive chemical products (pesticides, chlorinated water or synthetic fertilisers).
· Use in a well-ventilated area and with suitable protective equipment.
· Dispose of used packaging in accordance with local regulations.

Certifications

Product suitable for use in Organic Farming
in accordance with Regulations (EU)
No. 2018/848 and 2021/1165.
Control Ecocert F-32600.
